Polaroid – The name you can trust and rely on for your Identification Card Imaging Needs!

Polaroid's Identification Systems and product offerings are perfect solutions that will help protect and secure all businesses and industries. Whether you are a large or small corporation, government facility or municipality; or a retail business that services education, law enforcement, health care, childcare services, transportation, utility industries and others, we have the products that will best meet your needs. If you need a photo or non-photo Identification Card, B&W or Color, double-sided or single sided, magnetic stripe or bar code, numerous card security features, the versatility of our System 100i can easily accommodate any of your needs.

Optimum performance and high quality will be obtained with this carefully matched system. The Polaroid 100i RFID

double sided printer is extremely reliable and requires very little maintenance. It produces clear, sharp, edge to edge color optimized identification cards very quickly and easily.

Our new P100i enhanced ribbons

achieve the superior quality you have been searching for. The PDC 2150 digital camera comes with USB and serial interfaces, has a built in flash, and is portable, efficient and easy to use. It operates with a custom designed direct interface which will maximize efficiency and productivity. The third component of this all inclusive system is Polaroid's easy to use and full featured ID Card Maker software (several versions to choose from). ID Card Maker software gives you complete control, allowing you to design/modify your database, create multiple card layouts, capture images and/or signatures, and manage all of your data and images in a very secure environment.

Other requirements? Speak with your Polaroid ID representative for additional system products, customized solutions and services that better meet your needs. Systems are available to manage small or large databases, duplex and batch printing, network installations, and advanced security features. Polaroid also offers a complete line of identification card accessories, extended service agreements/warranties and product upgrades to ensure your identification system will always be current.
